INTERNATIONAL SEARCH REPORT

Box I Observati	ions where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This International Sea	arch Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. Claims Nos. because the	:.: ey relate to subject matter not required to be searched by this Authority, namely:
	s.: ey relate to parts of the International Application that do not comply with the prescribed requirements to such at no meaningful International Search can be carried out, specifically:
3. Claims Nos because the	s.: ey are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II Observati	ions where unity of invention is lacking (Continuation of item 2 of first sheet)
This International Se	earching Authority found multiple inventions in this international application, as follows:
see ado	ditional sheet
As all requires searchable	red additional search fees were timely paid by the applicant, this International Search Report covers all claims.
2. As all searce of any additional control of any additional control of any additional control of the control o	chable claims could be searched without effort justifying an additional fee, this Authority did not invite payment tional fee.
	ne of the required additional search fees were timely paid by the applicant, this International Search Report those claims for which fees were paid, specifically claims Nos.:
	d additional search fees were timely paid by the applicant. Consequently, this International Search Report is the Invention first mentioned in the claims; it is covered by claims Nos.: 5, 7 (partially), 8 (partially)
Remark on Protest	The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International Application No. PCTGB 03 \(04046 \)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1, 2, 5, 7 (partially), 8 (partially)

Use of a lactic acid producing microorganism for the treatment of a cereal-based food material or the cereal base therefor to reduce acrylamide production in subsequent cooking thereof.

Process for the production of a food product, comprising fermenting a granulated or crushed carbohydrate-containing cereal material with a lactic acid producing microorganism (optionally formulating the fermented material into a shaped product) and cooking to produce said food product. Cereal-based food material produced by the aforementioned process or use.

2. claims: 3, 4, 6, 7 (partially), 8 (partially)

Use of a physiologically acceptable acid for the treatment of a cereal-based food material or the cereal base therefor to reduce acrylamide production in subsequent cooking thereof.

Process for the production of a food product, comprising treating a granulated or crushed carbohydrate-containing cereal material with a physiologically tolerable aqueous acid (optionally formulating the fermented material into a shaped product) and cooking to produce said food product. Cereal-based food material produced by the aforementioned process or use.
